

# GE/Remcon (3-wire systems) Relay Upgrade Options

## Centralized Relay Panel

Multiple relays in each of one or several relay panels with enclosure

**ZoneZ Universal Relay** -Full panel or combo kit -20 amp relays -Controls 8 circuits on each set of boards  
-Simple ON/OFF control -Pilot light functionality -Compatible with all of Touch-Plate's analog wall switches

**ZoneZ Universal Dimmer** -Full panel or combo kit -2 amps per channel -Controls 8 circuits on each set of boards  
-Simple ON/OFF control -Simple dimming (longer button presses to dim up and dim down) -Pilot light functionality  
-Compatible with all of Touch-Plate's analog wall switches

**Calypso Nextgen Relay** -Full panel or combo kit -Larger control board size -25 amp industrial UL relays  
-Controls 8 circuits on each set of boards -Simple ON/OFF control -Some grouping functions -Pilot light functionality  
-Compatible with all of Touch-Plate's analog wall switches

**Soluxe Universal Relay w/ Time-Keeper** -Full panel or combo kit -20 amp relays -Controls 8 circuits on each set of boards  
-Fully programmable through Time-Keeper -Scenes, timed events, sequences, grouping, etc.  
-Optional Web Interface for smart control -Pilot light functionality -Compatible with all of Touch-Plate's analog wall switches

**Solare Universal Dimmer w/ Time-Keeper** -Full panel or combo kit -2 amps per channel  
-Controls 8 Circuits on each set of boards -Dim cycle or dim to level -Fully programmable through Time-Keeper  
-Scenes, timed events, sequences, grouping, etc. -Optional Web Interface for smart/web control -Pilot light functionality  
-Compatible with all of Touch-Plate's analog wall switches

## Other Options

- ZoneZ Minis**: 15 amp relays, small footprint for tight spaces, simple ON/OFF control
- ZoneZ/Solare Lite Dimmers**: 1 amp per channel/4 channel dimmers, can be used for basic or programmable systems for smaller lighting loads
- Solare Phase Dimmers**: 5 amps per channel/4 channel dimmers, can be used for basic or programmable systems for larger lighting loads

## Isolated Relay Packs

Relays are spread throughout the house or attic near or in the light fixtures that they control.

## ZoneZ Single Relay Packs

- 20 amp single relay & transformer in one
- Pilot light functionality
- Available as nipple mount or panel mount
- Rated for use in attics, basements, or in climate controlled areas
- Compatible with all of Touch-Plate's analog wall switches
- Commons must not be shared with the existing GE/Remcon system

## ZoneZ Single Dimmer Packs

- 5 amp single dimmer & transformer in one
- Simple dimming (longer button press to dim up and dim down)
- Pilot light functionality
- Available as nipple mount or panel mount
- Rated for use in attics, basements, or in climate controlled areas
- Compatible with all of Touch-Plate's analog wall switches
- Commons must not be shared with the existing GE/Remcon system

## Zigbee Mini Relays/Dimmers

- 4 amp single dimmer & transformer in one
- Simple dimming (long press to dim up/down)
- Small size for use inside a light fixture
- Rated for use in climate controlled areas
- Compatible with Touch-Plate's analog switches
- Commons must not be shared with the existing GE/Remcon system
- Zigbee connectivity for optional smart control
